"We can't just surrender!" Tiva says, a hint of hysteria in her voice. "Do you really want to go back to those labs? You've seen what they have waiting for us! We have this one chance to stand up for ourselves and fight!"

Payat nods. "I agree with Tiva," he says, dragging his claws along his arm nervously. "I'd rather go out fighting."

The debate between the wolves of your party is furious. No one decision will please everyone, but eventually you settle on a plan of action.

- We reverse our course and surprise the humans that were chasing us from behind.
- We rush forward on all fours at the soldiers in the tank, hoping to take them out before they can rip us to shreds.
- If we don't surrender, we're all going to die. I fall to my knees, hands above my head in submission. The others do the same.
- They're government soldiers so they must follow the law. I declare us noncombatants according to Haven Peace Accords.

Played it in normal mode, quite challenging. Amazing level design and filled with "motion riddles" and trial and error tasks. Love the hardcore element, superb soundtrack.

Highly recommend to people playing hardcore games. I would play this after Dark Souls and before Cuphead, that feels a bit harder.. Fun game! Can't wait to play more!. Hi, i dont want this game please give me money for this game. The game does crash often and doesn't save often enough. The puzzles are random non-sense and don't always work like they should. I ran into a wall literally, and fell out of the map. The game feels and looks half done and half made. I have never wanted my money back with any game I didn't like after purchasing but this is the first. Hostel creators or object in the game have large hit boxes and are unnecessarily hard to get past. I just don't like this game...

I would NOT recommend this game to anyone. If you do end up buying this game then just don't go over two hours so you can get your money back.. This game is great. I love the stealth aspect and trying to figure out how to get through all the levels without being detected. Id really recommend this game to anyone who likes hardcore stealth.

There is a few things that I dont like. I wish there was a Save feature, even if the save feature was limited like only being able to save 3 times would be so helpful. I also wish the silenced pistol actually killed in 1 or 2 shots instead of using a whole clip on someone.

but beyond those flaws its really fun and addicting. Great looking armor pack. Probably the best DLC of the bunch for this game.

I don't even like the Space Wolves, but I like this pack just for the Black Templars, it's that good.

[While the concept of the game is interesting, sadly the execution is lacking.](#)

[The biggest issue is just how overall cumbersome the controls are. The idea of switching between third and first person is nice idea, however it requires you to constantly hold down your right mouse button to stay in 1st person. If you release the mouse then you switch back to third person, only now the movement keys change direction. Very frustrating.](#)

[Also the performance is pretty laggy for such low intensity graphics. And finally the combat - you only get two slow firing weapons, and there is very little feedback as to where the enemies are shooting from, and no indications when you are being hit. So with no health bar you will just suddenly find yourself dead. Mercifully there are at least in game checkpoints, but no save game. Rinse and repeat infinitely.](#)

[For a bit more work on the controls and combat this game could have been quite fun, as it is however, it is more frustration than anything else so hard to recommend.](#)

[I got this in the bundle when it was on sale so I'm not as disappointed as some that bought it right away or at full price. It's not the best DLC by far, but it did have a few items that I liked.. It was an ok game. Kept me occupied for a while.. Pretty good. Felt like it ended abruptly though but I can't wait for the 2nd chapter to come out :D. This minimalistic puzzle game is a must-have for every puzzle lover! The puzzles have a gradual learning curve, with new mechanics introduced for each new puzzle area.](#)

[It took me three hours to solve it 100% and it didn't get boring along the way but kept on intriguing me. Very good value for a price of 5€.](#)
